

ENERGY COSTS ARE THE BIGGEST CONCERN WE HAVE THIS QUARTER.

WE NEED A SYSTEM FOR ANTICIPATING ROOF INTEGRITY ISSUES BEFORE THINGS GET HOT.

FROZEN INVENTORY IS ONLY AS SAFE AS THE SEALS THAT PROTECT IT.

THE REFRIGERATION UNIT IS WORKING OVERTIME, CREATING A STRAIN ON THE EQUIPMENT AND INCREASING ENERGY COSTS.

+ MORE THAN +2.738 DEGREE RISE IN TEMPERATURES AND OUR COLD STORAGE IS COOKED.

# COLD STORAGE.

The team you need to keep your cool.

The Most Trusted & Respected Roofing Company in the U.S.

800.551.5602 ■ [naroofing.com](http://naroofing.com)

Keeping cold storage systems cold seems like the most basic, common-sense task on the planet. And yet, in practical application, in the midst of wind damage, storms, tears in your roof's membrane, or even a few loose screws from a sloppy HVAC installation, that simple-sounding task can become highly complex. Even a degree or two in temperature variance can be disastrous to your inventory, and your company's bottom line. That's why you need the experience, leadership, and service model of North American Roofing. We'll ensure your vapor barrier is impenetrable. Our approach means your refrigeration equipment won't begin working overtime due to a leak, and lead to damage to perishable items from frost and ice crystal formation. We know the importance of the design development process and we can help develop specifications unique to your cold storage facility. Call 800.551.5602 to learn more.

## OUR COLD STORAGE QUALIFICATIONS, AT A GLANCE:

- Experienced engineering and technical professionals available to collaborate and assist with writing and developing specifications unique to your cold storage facility
- Comprehensive and itemized proposals for every roof installation detail
- Real-time collaboration on every project through on-site project management
- Accountability to provide the best customer experience with the industry's only customer action center—ensuring every project is completed to the customer's expectations.
- Dedicated quality and safety inspectors that ensure a safe and secure work environment for our customers' businesses and our employees
- Nationwide contractor, certified and highly accommodated for quality by all major roofing manufacturers to provide commercial roof warranty systems and support

## INTELLIGENT SOLUTIONS LEAD TO SAVINGS.

Single-ply TPO or PVC roofing is a natural solution for cold storage facilities. With superior reflectivity, unsurpassed wind uplift resistance, and the ability to form a vapor-tight barrier, single-ply TPO or PVC membranes provide the best long-term roofing protection. Coupled with layers of rigid insulation materials like polystyrene or polyisocyanurate, as well as a properly installed vapor barrier, cold storage facilities can realize immediate energy savings.

## SMALL DESIGN FLAWS LEAD TO BIG PROBLEMS LATER.

The installation of a cold storage roof, unlike a standard warehouse roof, requires superior knowledge and experience in the design and construction of the roof-to-storage barrier. The biggest cause of cold storage roof failure is the result of faulty workmanship. A quality roofing company must integrate flawlessly with facility managers, architects, designers, subcontractors, and local authorities. North American Roofing is unequalled in the professional installation and repair of cold storage facility roofs.

## OUR SATISFIED CUSTOMERS:

North American Roofing creates lifelong partnerships by continually exceeding our customers' expectations. Below are just a few of our happy cold storage facility customers:

- Lineage Logistics
- U.S. Cold Storage
- Americold Logistics
